

# WAX RECOMMENDATION **TOKO**<sup>®</sup>

## Race for the Diamonds

Ponderosa State Park, McCall, ID

Saturday, January 8

6 P.M.

1K/3K/5K, Skate

Self-seeded 2-person team mass start (teams assigned), bring a headlamp

2 laps per team

[WWW.McCallNordic.com](http://WWW.McCallNordic.com)

**Forecast/Conditions:** New snow and warm temperatures throughout the week and into Friday night. Friday night low of 19, Saturday high of 27, reduced temperature and clouds near start time. Expect a soft track.

**Glidewax:** Apply High Performance Blue Hot Wax, scrape and brush. Spray High Performance Red Liquid Paraffin on to the polishing side of a Thermo Cork and wipe over the glide zone, let stand overnight, then polish with the Polishing Brush Liquid Paraffin. If you do not have LP spray substitute BP Blue Hot Wax for the HP Blue Hot Wax base, then apply HP Red Hot Wax, scrape and brush.

**Structure:** A universal structure covered by one pass with the Red Structurite tool after scraping and brushing HP Hot Wax or before spraying HP LP will best suit these conditions.

Check the [Wax Tips](#) page at [TokoUS.com](http://TokoUS.com) before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at [TokoUS.com](http://TokoUS.com).
