

# WAX RECOMMENDATION **TOKO**<sup>®</sup>

## **Nordic Spirit Ski Race**

Spirit Mountain, Duluth, MN

Saturday, January 29

10 A.M.

24K and 12K Classic

Mass start

One loop for 12K and two loops for 24K

<http://www.duluthxc.com/nordic-spirit>

**Forecast/Conditions:** Overnight low will be 2F and temperature at start will be 13. Expect cold snow tilled and packed. Watch for leaves and woody material from high winds and expect areas of thin snow pack.

**Glidewax:** Apply High Performance Blue Hot Wax, scrape and brush. Spray on HP LP Blue, let stand overnight, then polish with the Polishing Brush Liquid Paraffin. If you do not have LP spray, after scraping and brushing BP Blue Hot Wax, apply HP Blue Hot Wax and X-cold powder 1:1, scrape and brush.

**Gripwax:** Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply 2-3 layers of Nordic GripWax Blue, corking between layers.

**Structure:** A fine structure covered by one pass with the Blue Structurite tool after scraping and brushing HP Hot Wax or before spraying HP LP will best suit these conditions.

Check the [Wax Tips](#) page at [TokoUS.com](http://TokoUS.com) before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at [TokoUS.com](http://TokoUS.com).
