

# WAX RECOMMENDATION

## River View Loppet

After Hours Trails, Brule, WI

Saturday, January 15

11 A.M.

Races in order: 10K/18K Classic, 18K Skate, 10K Skate

Freestyle races start 10 minutes after Classic

<https://brulexcski.com/river-view-loppet>

Forecast/Conditions: Overnight low of -4F, temperature at start will be 8F. Snow will fast considering the cooler temperatures. Mostly sunny skies with almost no wind.

Glidewax: Apply High Performance Blue Hot Wax, sprinkle on X-cold Powder, iron in together, scrape and brush. Spray on High Performance Blue Liquid Paraffin, let stand overnight, then polish with the Polishing Brush Liquid Paraffin. If you do not have LP spray, apply BP Blue Hot Wax, scrape and brush before applying the HP Blue Hot Wax/X-cold Powder.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply several layers of Nordic X-Cold gripwax, corking between layers.

Structure: A fine linear grind covered by one pass with the Blue Structurite tool after scraping and brushing the HP layer or before spraying on the HP LP will best suit these conditions.

Racing - Service

Check the [Wax Tips](#) page at [TokoUS.com](http://TokoUS.com) before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at [TokoUS.com](http://TokoUS.com).
