

# WAX RECOMMENDATION

## Snow Mountain Ranch Classic

Snow Mountain Ranch, Granby, CO

Saturday, January 15

10 A.M.

15K/7.5K, Classic

Mass start

Loops

More info [here](#)

Forecast/Conditions: Overnight low of -5F, air temperature in the single digits by the start time. Expect slow dry snow conditions under sunny skies.

Glidewax: Apply High Performance Blue Hot Wax, scrape and brush. Spray on HP LP Blue, let stand overnight, then polish with the Polishing Brush Liquid Paraffin. If you do not have LP spray, after scraping and brushing HP or BP Blue Hot Wax, apply another layer of HP or BP Blue Hot Wax, scrape and brush.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply 3-4 thin layers of Nordic GripWax Blue, corking between layers.

Structure: A fine structure will best suit these conditions.

Racing - Service

Created by Stephen White, Toko Tech Team member since 2005.

Check the [Wax Tips](#) page at [TokoUS.com](#) before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at [TokoUS.com](#).
