

# WAX RECOMMENDATION

## Ski For Soren

Crosscut Mountain Sports Center, Bozeman, MT

Saturday, January 22

11 A.M. Start

20K, 10K & 5K distances; Freestyle technique

Mass start; 5K course

<https://www.crosscutmt.org/>

**Forecast/Conditions:** Friday night mostly cloudy, overnight low near 17. Temperature at start near 25. Expect a mix of mostly new snow with some older snow and possibly dry and wind-blown on parts of the course.

**Glidewax:** Apply High Performance Blue Hot Wax, scrape and brush. Spray on High Performance Blue Liquid Paraffin, let stand overnight, then polish with the Polishing Brush Liquid Paraffin. If you do not have LP spray, after scraping and brushing BP Blue Hot Wax, apply HP Blue Hot Wax, scrape and brush.

**Gripwax:** Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply 3-5 layers of Nordic GripWax Red, corking between layers.

**Structure:** A universal structure covered by one pass with the Blue Structurite tool after scraping and brushing HP Hot Wax or before spraying HP LP will best suit these conditions. If the snow has some moisture, make one additional pass with the Red Structurite tool.

Created by Eric Mittelsteadt, Toko Tech Team member since 1999.

Check the [Wax Tips](#) page at [TokoUS.com](http://TokoUS.com) before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at [TokoUS.com](http://TokoUS.com).
