

# WAX RECOMMENDATION

## Tahoe Rim Tour and Race

Tahoe City to Northstar, Tahoe City, CA

Sunday, January 30

9 A.M. Classic, 9:30 A.M. Skate

26K, Classic or Skate

Mass start per discipline

Point-to-Point

<http://www.farwesntordic.org>

**Forecast/Conditions:** Overnight low 25, temperature at start 32, high of 42. Old, transformed, sugar snow. Partly cloudy with light winds.

**Glidewax:** Apply High Performance Blue Hot Wax, scrape and brush. Spray on High Performance Red Liquid Paraffin, let stand overnight, then polish with the Polishing Brush Liquid Paraffin. If you do not have LP spray, after scraping and brushing BP Blue Hot Wax, apply HP Red Hot Wax, scrape and brush.

**Gripwax:** Roughen base with 150 grit sandpaper, iron in Nordic Base Klister Green, smooth and let cool. Then apply 1 layer of Nordic Klister Red, smooth and let cool.

**Structure:** A universal structure covered by one pass with the Red Structurite tool after scraping and brushing HP Hot Wax or before spraying HP LP will best suit these conditions.

**Racing - Service**

Check the [Wax Tips](#) page at [TokoUS.com](http://TokoUS.com) before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at [TokoUS.com](http://TokoUS.com).
