

WAX RECOMMENDATION **TOKO**[®]

Wisconsin Biathlon Cup #5

Blackhawk Trails, Middleton, WI

Saturday, January 22

10 A.M. 10K Open Race

11:20 A.M. 4.5K Jr. Race

See website for race and start time details:

<https://www.webscorer.com/register?raceid=265152>

Forecast/Conditions: Friday night's low is expected around 6F, with race time temperatures expected in the upper teens. Mostly cloudy skies and a slight chance of snow.

Glidewax: Apply High Performance Blue Hot Wax, scrape and brush. Spray on High Performance Blue Liquid Paraffin, let stand overnight, then polish with the Polishing Brush Liquid Paraffin. If you do not have LP spray, apply BP Blue Hot Wax, scrape and brush before applying HP Blue Hot Wax.

Structure: A universal structure covered by one pass with the Blue Structurite tool after scraping and brushing HP Hot Wax or before spraying HP LP will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
