

WAX RECOMMENDATION

Prospect Mountain Sprints

Prospect Mountain, Woodford, VT

Sunday, January 23

10 A.M. Qualifiers, 12:30 P.M. Heats

Freestyle, 1.2K

<https://www.skireg.com/prospect-freestyle-sprints>

Forecast/Conditions: Saturday night low of 7F, warming up to high of 22 on Sunday with mostly cloudy skies and light winds. Low chance of precipitation for the days before the race.

Glidewax: Apply High Performance Blue Hot Wax, scrape and brush. Spray on High Performance Blue Liquid Paraffin, let stand overnight, then polish with the Polishing Brush Liquid Paraffin. If you do not have HP spray, after scraping and brushing HP Blue Hot Wax, apply HP Blue Hot Wax, scrape and brush. If desired, spray on High Performance Blue Liquid Paraffin for heats right after qualifier, brush before heats.

Gripwax: N/A

Structure: A universal structure covered by one pass with the Blue Structurite tool after scraping and brushing HP Hot Wax or before spraying HP LP will best suit these conditions.

Created by Ben Lustgarten, Toko Tech Team member since 2020.

Check the [Wax Tips](#) page at [TokoUS.com](https://www.toko.com) before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at [TokoUS.com](https://www.toko.com).
