Hardware store parking lot, Plain, WA

Sunday, February 20

8 A.M. to 4 P.M., Self-timed event w/QR codes

9K, Freestyle technique

Wax tip for 8 A.M. - 10A.M. start

2 laps

<http://www.SkiPlain/tourdeplain.com>

Forecast/Conditions: Overnight low of 27 rising to 38 by early Sunday afternoon. Snowpack is firm and fully transformed. Rain mixed with snow is predicted for Saturday night and Sunday morning with little expected accumulation under mostly cloudy skies for most of the day. Fastest times should be recorded early.

Glidewax: Apply High Performance Red Hot Wax, scrape and brush. Spray on High Performance Yellow Liquid Paraffin, let stand overnight, then polish with the Polishing Brush Liquid Paraffin. If you do not have LP spray, apply BP Red Hot Wax, scrape and brush, then apply HP Yellow Hot Wax, scrape and brush.

Gripwax: NA

Structure: A fine structure covered by one pass with the Red Structurite tool followed by a pass with the Blue Structurite tool after scraping and brushing HP Hot Wax or before spraying HP LP will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
