

# WAX RECOMMENDATION

## Allan Bard Memorial Classic

Tamarack Lodge, Mammoth Lakes, CA

Sunday, February 6

9 A.M.

10K or 20K, Classic Only

Mass Start

1-2 laps

[tamaracklodge.com](http://tamaracklodge.com)

**Forecast/Conditions:** Overnight low 22, temperature at start 31, high of 36. Expect old, transformed sugar snow. Mostly sunny with light winds on race day.

**Glidewax:** Apply High Performance Blue Hot Wax, scrape and brush. Spray on High Performance Red Liquid Paraffin, let stand overnight, then polish with the Polishing Brush Liquid Paraffin. If you do not have LP spray, after scraping and brushing BP Blue Hot Wax, apply HP Red Hot Wax, scrape and brush.

**Gripwax:** Roughen base with 150 grit sandpaper, iron in Nordic Base Klister Green, smooth and let cool. Then apply 1 layer of Nordic Klister Red and Klister Blue mixed 1:1, heat in together and smooth. Cool before skiing.

**Structure:** A fine structure covered by one pass with the Red Structurite tool after scraping and brushing HP Hot Wax or before spraying HP LP will best suit these conditions.

Created by Ben Grasseschi, Toko Tech Team member since 2003.

Racing - Service

Check the [Wax Tips](#) page at [TokoUS.com](http://TokoUS.com) before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at [TokoUS.com](http://TokoUS.com).
