

WAX RECOMMENDATION

Colorado Biathlon State Championships

Snow Mountain Ranch, Granby, CO

Sunday, February 13

10:35 A.M. 1st wave start

Loops

<https://www.coloradobiathlon.org/schedule.html>

Forecast/Conditions: Overnight low of 7F warming to upper teens air temperature by the start under Sunday skies. The wind will keep the snow cold and dry.

Glidewax: Apply High Performance Blue Hot Wax, sprinkle on X-Cold Powder, iron in together, scrape and brush. Spray on HP LP Blue, let stand overnight, then polish with the Polishing Brush Liquid Paraffin. If you do not have LP spray, apply BP Blue Hot Wax/X-Cold, scrape and brush, then apply HP Blue Hot Wax, scrape and brush.

Gripwax: N/A

Structure: A fine structure covered by one pass with the Blue Structurite tool after scraping and brushing HP Hot Wax or before spraying HP LP will best suit these conditions.

Created by Stephen White, Toko Tech Team member since 2005.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
