Self-seeded mass start

10.5 K loops

https://vasaloppet.us/moraloppet-ski-for-the-cause/

Forecast/Conditions: Overnight low -9F rising to 7F by the start. A 15 mph wind from the south. Mostly cloudy. Expect a mix of transformed natural and manmade snow comprising a firm racing platform. A 25 percent chance of snow from 6 A.M and throughout the race.

Glidewax: Apply High Performance Blue Hot Wax, sprinkle on X-Cold Powder, iron in together, scrape and brush. Spray on High Performance Blue Liquid Paraffin, let stand overnight, then polish with the Polishing Brush Liquid Paraffin. If you do not have LP spray, after scraping and brushing a layer of BP Blue Hot Wax, apply HP Blue Hot Wax, sprinkle on X-Cold Powder, iron in together, scrape and brush. See TokoUS.com videos for instructions on applying X-Cold Powder with Blue Hot Wax.

Structure: A fine or universal structure covered by one pass with the Blue Structurite tool after scraping and brushing HP Hot Wax or before spraying HP LP will best suit these conditions.
