

WAX RECOMMENDATION **TOKO**[®]

Minnesota High School League Section 4

Wirth Park, Minneapolis, MN

Thursday, February 10

10 A.M. Classic 5K, Interval start

Noon Relays; 1:30 P.M. Skate 5K, Pursuit start

Forecast/Conditions: Overnight low of 8F rising to 14 for the Classic races, 22 for the Relays and 27 for the Skate race. Chance of snow becomes 50 percent at noon. Mild wind and mostly cloudy. PistenBully prepared manmade snow course will be solid but break down from heavy traffic.

Glidewax: Apply High Performance Blue Hot Wax, scrape and brush. Spray on High Performance Red Liquid Paraffin, let stand overnight, then polish with the Polishing Brush Liquid Paraffin. If you do not have LP spray, apply BP Blue Hot Wax, scrape and bursh, then apply HP Red Hot Wax, scrape and brush.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply two layers of Nordic GripWax Yellow followed by additional layers of Nordic GripWax Red, corking between layers.

Structure: A fine or universal structure covered by one pass with the Red Structurite tool followed by one pass with the Blue Structurite tool after scraping and brushing HP Hot Wax or before spraying HP LP will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
