

# WAX RECOMMENDATION TOKO®

## Wasatch Citizen Series Race #5

White Pine Touring Center at The Farm, Park City, UT

Saturday, February 26

10 A.M. Juniors, 10:30 A.M. Adults

20K Skate with shorter distances for Juniors and novices

Wave starts

Full distance will be 3 laps on 7K course

<https://www.utahnordic.org/wcs/>

**Forecast/Conditions:** Overnight low zero F, temperature at start in the low teens with clear skies. The snow will be a mixture of old ground up icy snow and very cold new powder snow that will be slow.

**Glidewax:** Apply High Performance Blue Hot Wax, scrape and brush. Spray on High Performance Blue Liquid Paraffin, let stand overnight, then polish with the Polishing Brush Liquid Paraffin. If you do not have LP spray, apply BP Blue Hot Wax, scrape and brush, then apply HP Blue Hot Wax, scrape and brush.

**Structure:** A very fine stone ground structure covered by one pass with the Blue Structurite tool after scraping and brushing HP Hot Wax or before spraying HP LP will best suit these conditions.

Created by Barry Makarewicz, Toko Tech Team member since 2000.

Check the [Wax Tips](#) page at [TokoUS.com](http://TokoUS.com) before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at [TokoUS.com](http://TokoUS.com).
