

WAX RECOMMENDATION

Wolf Tracks Rendezvous - Updated!

Minoqua Winter Park, Minoqua, WI

Saturday, February 5

9:30 A.M.-11:30 A.M.

42K and 24K, Skate and Classic divisions

Wave start, Single lap courses

<http://www.minocquawinterpark.org/wolftracks/>

Forecast/Conditions: Friday night partly cloudy with a low of -11F. Saturday light snow starting after 5 A.M. and increasing by race start time with a temperature of 5F-10F. Trail should be firm and with new snow falling expect conditions to become abrasive.

Glidewax: Apply Performance Blue Hot Wax, scrape and brush. Then apply High Performance Blue Hot Wax, sprinkle on X-Cold Powder, iron in together, scrape and brush. Due to the falling snow during the event, we are not recommending HP Liquid Paraffin as the final layer.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply 3-4 layers of Nordic GripWax X-Cold, corking between layers.

Structure: A fine grind with no additional structure will best suit these conditions.

Created by Michael Young, Toko Tech Team member since 2005.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
