

WAX RECOMMENDATION **TOKO**[®]

Michigan High School Championships - Skate

Al Quaal Recreation Area, Ishpeming, MI

Friday, February 11

3 P.M. - 5 P.M., 5K Freestyle

Interval start

Two lap course

[Event Details](#)

Forecast/Conditions: Snow showers and temperature rising to near 24 by 10 A.M., then falling to around 18 at race time. New snow accumulation of around an inch possible during the day. Expect mixed precipitation with new snow on top of packed and machine worked powder.

Glidewax: Apply High Performance Blue Hot Wax, scrape and brush. Spray on High Performance Red Liquid Paraffin, let stand overnight, then polish with the Polishing Brush Liquid Paraffin. If you do not have LP spray, apply BP Blue Hot Wax, scrape and brush, then apply HP Red Hot Wax, scrape and brush.

Gripwax: n/a

Structure: A fine structure covered by one pass with the Red Structurite tool followed by one pass with the Blue Structurite tool after scraping and brushing HP Hot Wax or before spraying HP LP will best suit these conditions.

Created by Michael Young, Toko Tech Team member since 2005.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
