

# WAX RECOMMENDATION TOKO®

## Last Chance Race

Vasaloppet Nordic Center, Mora, MN

Saturday, March 19

10 A.M.

Freestyle

Self-seeded mass start

<https://vasaloppet.us>

Forecast/Conditions: After a thaw/freeze cycle over the next two days and nights the temperature is expected to drop to a low of 25 Friday evening, rising to 30 at the start. Mostly sunny and calm winds. The course will be on manmade snow, machine prepped and may be dirty in a few spots.

Glidewax: Apply High Performance Red Hot Wax, scrape and brush. Spray on High Performance Yellow Liquid Paraffin, let stand overnight, then polish with the Polishing Brush Liquid Paraffin. If you do not have LP spray, apply BP Red Hot Wax, scrape and brush, then apply HP Yellow Hot Wax, scrape and brush.

Structure: A universal structure covered by one pass with the Yellow Structurite tool after scraping and brushing HP Hot Wax or before spraying HP LP will best suit these conditions.

Racing - Service

Check the [Wax Tips](#) page at [TokoUS.com](http://TokoUS.com) before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at [TokoUS.com](http://TokoUS.com).
