

WAX RECOMMENDATION TOKO®

Wisconsin Biathlon Cup #8

Blackhawk Ski Club, Middleton, WI

Sunday, March 5

10 A.M. Age 15 and older, 11:45 A.M. Age 14 and under

Biathlon Relay 3 x 1.5K

http://www.wisconsinbiathlon.com/biathlon_cup.html

Forecast/Conditions: Overnight low in the upper 30s with a daytime high of about 45 under mostly cloudy skies. The start time temperature will be around 40 with a diminishing chance of rain. Expect a machined race course comprised of a wet, dirty, manmade snow base.

Glidewax: Apply High Performance Blue/Red Hot Wax mixed 1:1, scrape and brush. Spray on High Performance Yellow Liquid Paraffin, let stand overnight, then polish with the Polishing Brush Liquid Paraffin. If you do not have LP spray, apply BP Red Hot Wax, scrape and brush, then apply HP Red Hot Wax, scrape and brush.

Gripwax: N.A.

Structure: A coarse structure covered by one pass with the Yellow Structurite tool after scraping and brushing HP Hot Wax or before spraying HP LP will best suit these conditions.

Racing - Service

Check the [Wax Tips](#) page at [TokoUS.com](#) before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at [TokoUS.com](#).
