

WAX RECOMMENDATION **TOKO**[®]

Rikert Grand Prix

Rikert Nordic Center, Ripton, VT

Saturday, March 19

10 A.M.

10K, Classic

Mass start, 1 lap

<https://www.rikertnordic.com>

Forecast/Conditions: Friday overnight low of 36, temperature at start in the low 40s with a high chance of rain, PistenBully groomed trail.

Glidewax: Apply High Performance Blue Hot Wax, scrape and brush. Spray on High Performance Yellow Liquid Paraffin, let stand overnight, then polish with the Polishing Brush Liquid Paraffin. If you do not have LP spray, apply BP Red Hot Wax, scrape and brush, then apply HP Yellow Hot Wax, scrape and brush.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Klister Green, smooth. While the klister is still tacky, apply a thin layer of Nordic Klister Yellow and smooth out.

Structure: A wet structure covered by one pass with the Yellow Structurite tool after scraping and brushing HP Hot Wax or before spraying HP LP will best suit these conditions.

Created by Dave Boucher, Toko Tech Team member since 1999.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
