

WAX RECOMMENDATION TOKO®

Kongsbergers Stampede & WNC #4

Cabin Creek Exit 63 Hwy 90, Snoqualmie Pass, WA

Sunday, January 29

10:30 A.M. first wave

15K, 5K, 2K, 1K, .5K, Free technique

Wave start

15K is 3 laps

<http://www.kongsbergers.org>

Forecast/Conditions: Overnight low of 12 Saturday night after receiving a few inches of new snow Saturday on top of a wet firm snowpack. Sunday high of 21 on a sunny day by race completion. Should be a fast race.

Glidewax: No fluorinated waxes allowed at Kongsberger races.

Apply High Performance Blue Hot Wax, scrape and brush. Spray on High Performance Blue Liquid Paraffin, let stand overnight, then polish with the Polishing Brush Liquid Paraffin. If you do not have LP spray, apply BP Blue Hot Wax, scrape and brush, then apply HP Blue Hot Wax, scrape and brush.

Gripwax: NA

Structure: A fine structure covered by one pass with the Blue Structurite tool after scraping and brushing the final Hot Wax or before spraying HP LP will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
