

WAX RECOMMENDATION TOKO®

Lapham Loppet

Lapham Peak State Park, Delafield, WI

Saturday, January 14

10:30 A.M.

10.4K Freestyle

Wave starts

6 laps of the out manmade loop

<https://laphampeakfriends.org/skiing/#loppet>

Forecast/Conditions: Friday night low around 20 with temperature at start around 27, partly sunny. Expect icy and corned-up, dirty manmade snow.

Glidewax: Apply High Performance Blue Hot Wax, scrape and brush. Spray on High Performance Yellow Liquid Paraffin, let stand overnight, then polish with the Polishing Brush Liquid Paraffin. If you do not have LP spray, apply BP Blue Hot Wax, scrape and brush, then apply HP Red Hot Wax, scrape and brush.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Klister Green, cork smooth, let cool. Then apply 1 layer of Nordic Klister Red, corking smooth.

Structure: A universal structure covered by one pass of the Red Structurite tool after scraping and brushing the final Hot Wax or before spraying HP LP will best suit these conditions.

Created by Ben Lund, Toko Tech Team member since 2000.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
