

WAX RECOMMENDATION TOKO®

Billy Goat Loppet

Sun Valley Nordic Center, Sun Valley, ID

Saturday, January 21

10:30 A.M.

10K, Skate

Wave start

<https://www.sunvalleyskiclub.com>

Forecast/Conditions: Overnight low 7F with partly cloudy skies, temperature at start in the high teens. Aggressive, slightly transformed snow. Mostly sunny for the race with no new precipitation. Most of the course is in shade.

Glidewax: Apply High Performance Blue Hot Wax, sprinkle on X-Cold Powder, [iron in together](#), scrape and brush. Finish with a horsehair brush to remove finer wax particles. Spray on High Performance Blue Liquid Paraffin, let stand overnight, then polish with the Polishing Brush Liquid Paraffin. If you do not have LP spray, apply BP Blue Hot Wax, scrape and brush, then apply HP Blue Hot Wax, scrape and brush.

Structure: A universal structure covered by one pass with the Blue Structurite tool after scraping and brushing the final Hot Wax or before spraying HP LP will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
