

WAX RECOMMENDATION TOKO®

Stagecoach Classic

Devil's Thumb Ranch, Tabernash, CO

Saturday, January 21

9 A.M.

15K/30K, Classic

Mass start by distance

15K loop

Forecast/Conditions: It has been a week of heavy snow in the mountains. The forecasted Friday night low is 2F and 8F at race start Saturday morning, but I would anticipate it being 5-10 degrees colder. There is slight change of snow later on in the race.

Glidewax: Apply Base Performance or Performance Blue Hot Wax, sprinkle on X-cold Powder, [iron in together](#), scrape and brush. The P Blue is a bit harder than BP Blue, which is helpful here to harden the base. Then apply HP Blue Hot Wax, scrape and brush.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply 4-5 thin layers of Nordic GripWax Blue, corking between layers.

Structure: A fine grind with no additional structure will best suit these conditions.

Check the [Wax Tips](#) page at [TokoUS.com](#) before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at [TokoUS.com](#).
