

WAX RECOMMENDATION TOKO®

First Chance Race

Vasaloppet Nordic Center, Mora, MN

Saturday, January 7

1 P.M.

5K/10K, Freestyle

Self-seeded mass start - 10k course, with 5K cutoff.

<https://vasaloppet.us/2022/12/2023-first-chance-race/>

Forecast/Conditions: Overnight low of zero F rising to 17 by race time. Natural snow tilled into manmade. PistenBully groomed. Mostly sunny, calm with little chance of precipitation within 36 hours of the start. Wet snow earlier in the week will make for more glazing than usual at these temperatures.

Glidewax: Apply High Performance Blue Hot Wax, scrape and brush. Spray on High Performance Red Liquid Paraffin, let stand overnight, then polish with the Liquid Paraffin Polishing Brush. If you do not have LP spray, apply BP Blue Hot Wax, scrape and brush, then apply HP Red Hot Wax, scrape and brush.

Structure: A fine or universal structure covered by one pass with the Red Structurite tool after scraping and brushing the final Hot Wax or before spraying HP LP will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
