

WAX RECOMMENDATION **TOKO**[®]

Freeman Frost White Mountain Classic

Jackson Ski Touring Foundation, Jackson, NH

Saturday, January 21

9:15 A.M.

21K, Classic

Rolling start

2-3 laps

<https://www.skireg.com/white-mountain-classic-half>

Forecast/Conditions: Snow Thursday and Friday with 5-10 inches of accumulation. New snow will be tilled in with old manmade snow. Low of 18 overnight, Saturday morning temperature at race time in the mid-20s, high in the low 30s.

Glidewax: Apply Base Performance Blue Hot Wax, scrape and brush. Then apply High Performance Red Hot Wax, scrape and brush.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply 3-4 layers of Nordic GripWax Red, corking between layers.

Structure: A universal structure covered by one pass with the Red Structurite tool after scraping and brushing the final Hot Wax will best suit these conditions.

Created by Stuart Kremzner, Toko Tech Team member since 2005

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
