

WAX RECOMMENDATION TOKO®

The Great Nordeen

Mt. Bachelor, Bend, OR

Sunday, January 29

7:30 A.M.

18K/30K, Skate

Mass start

Point to point

<https://mbsef.org/>

Forecast/Conditions: Overnight low on Saturday of around 5F. Chance of precipitation is 80 percent. New snow accumulation of 2-4 inches possible. Sunday partly sunny with a high of 10.

Glidewax: Apply High Performance Blue Hot Wax, sprinkle on X-Cold Powder, iron in together, scrape and brush. Spray on High Performance Blue Liquid Paraffin, let stand overnight, then polish with the Polishing Brush Liquid Paraffin. If you do not have LP spray, apply BP Blue Hot Wax, sprinkle on X-Cold Powder, iron in together, scrape and brush, then apply HP Blue Hot Wax, scrape and brush.

Gripwax: N/A

Structure: A universal structure covered by one pass with the Blue Structurite tool after scraping and brushing the final Hot Wax or before spraying HP LP will best suit these conditions.

Created by Colin Mahood, Toko Tech Team member since 2001.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
