

WAX RECOMMENDATION **TOKO[®]**

McCall Re-Mastered

Ponderosa State Park, McCall, ID

Saturday, January 21

10 A.M.

15K/30K/45K, Skate

Mass start

1-3 laps

<https://www.mccallnordic.com/racing/>

Forecast/Conditions: New snow midweek will help disperse dirt and debris beneath the pines. Friday night low in the mid-teens. Race start temperature around 22 with a high of 28, 70 percent humidity with some morning fog possible. The course will be a firm, tilled mix of new and transformed snow and is skiing fast.

Glidewax: Apply Base Performance Blue Hot Wax, scrape and brush. Then apply High Performance Red Hot Wax, scrape and brush.

Structure: A universal structure covered by one pass with the Red Structurite tool after scraping and brushing the final Hot Wax will best suit these conditions. Be sure to follow with the Nylon Polishing Brush after structuring.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
