

WAX RECOMMENDATION TOKO®

Seeley Hills Classic

OO Trailhead, Seeley, WI

Saturday, January 14

10 A.M. 42K start, 10:05 A.M. 22K start

(SuperTour start at 9 A.M.)

ALL Classic technique

Mass start

birkie.com

Forecast/Conditions: Overnight low of 13, high of 30. Snow is hardpacked, icy and glazing due to several wet snowfalls. Track should be firm.

Glidewax: Apply High Performance Blue Hot Wax, scrape and brush. Spray on High Performance Blue Liquid Paraffin, let stand overnight, then polish with the Polishing Brush Liquid Paraffin. If you do not have LP spray, apply BP Blue Hot Wax, scrape and brush, then apply HP Blue Hot Wax, scrape and brush.

Gripwax: Roughen base with 150 grit sandpaper, iron in medium thickness Nordic Base Wax Green, cork smooth, let cool. Then apply 6-8 alternating layers of Nordic GripWax Blue and Red, corking between layers. Later finishers can focus on more Red kick layers.

Structure: A fine structure covered by one pass with the Blue Structurite tool after scraping and brushing the final Hot Wax or before spraying HP LP will best suit these conditions.

Created by John Bauer, Toko Tech Team member since 1996.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
