

WAX RECOMMENDATION **TOKO**[®]

Winona Forest Try It

CCC Camp, Mannsville, NY

Saturday, January 28

9 A.M.

9K Classic, 9K/18K Skate

Mass start

<https://www.skireg.com/winonaforesttryit>

Forecast/Conditions: Overnight low 27, temperature at start 31, several inches of new fallen fresh powder from days prior. Cloudy skies with snow showers likely during the race.

Glidewax: Apply BP Red Hot Wax, scrape and brush, then apply HP Yellow Hot Wax, scrape and brush.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply 2 layers of Nordic GripWax Yellow, followed by one light layer of GripWax Red, corking between layers.

Structure: A universal structure covered by one pass with the Red Structurite tool after scraping and brushing the final Hot Wax layer will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
