

WAX RECOMMENDATION TOKO®

Woodland Loppet

Woodland Trails, Elk River, MN

Saturday, January 21

9 A.M. start

10K/20K, Freestyle, 10K laps

Waves of 35 leave in five minute increments

<https://runsignup.com/woodlandloppet>

Forecast/Conditions: Overnight low of 14 rising to 19 by the start. New snow from Wednesday and Thursday will be machine worked into a solid racing platform that should be fast. Mostly cloudy on Saturday. Little chance of additional precipitation on Friday or race day.

Glidewax: Apply High Performance Blue Hot Wax, scrape and brush. Spray on High Performance Red Liquid Paraffin, let stand overnight, then polish with the Liquid Paraffin Polishing Brush. If you do not have LP spray, apply BP Blue Hot Wax, scrape and brush, then apply HP Red Hot Wax, scrape and brush.

Structure: A fine or universal structure covered by one pass with the Red Structurite tool after scraping and brushing the final Hot Wax or before spraying HP LP will best suit these conditions.

Created by Gerald Slater, Toko Tech Team member since 2006. grslater@comcast.net

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
