

WAX RECOMMENDATION

TOKO[®]

CXC Cup GLD JNQ Freestyle

Ariens Nordic Center, Brillion, WI

Saturday, January 28

10 AM

5K/10K, Freestyle, Interval start

1-2 laps on 5K course

[Event Website](#)

Forecast/Conditions: Friday night mostly cloudy with a low around 9F and breezy. Saturday cloudy and race temperatures steady at 14-16. Expect transformed artificial snow mixed with a small amount of recent natural snow to be firm early and break down as the day progresses.

Glidewax: Apply High Performance Blue Hot Wax, scrape and brush. Spray on High Performance Blue Liquid Paraffin, let stand overnight, then polish with the Polishing Brush Liquid Paraffin. If you do not have LP spray, apply BP Blue Hot Wax, scrape and brush, then apply HP Blue Hot Wax, scrape and brush.

Gripwax: N/A

Structure: A fine structure covered by one pass with the Blue Structurite tool after scraping and brushing the final Hot Wax or before spraying HP LP will best suit these conditions.

Created by Michael Young, Toko Tech Team member since 2005.

Check the [Wax Tips](#) page at [TokoUS.com](#) before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at [TokoUS.com](#).
