

WAX RECOMMENDATION **TOKO**[®]

Hodag Challenge Classic

CAVOC Trails, Rhinelander, WI

Saturday, January 21

10 A.M. Girls, 11:15 A.M. Boys

5K, Classic technique

Interval start

[Event Website](#)

Forecast/Conditions: Friday night mostly cloudy with a low around 10F. Saturday mostly cloudy with race time temperature 17-20. Expect new snow arriving Thursday to be machine worked and packed into a solid track.

Glidewax: Apply High Performance Blue Hot Wax, scrape and brush. Spray on High Performance Blue Liquid Paraffin, let stand overnight, then polish with the Polishing Brush Liquid Paraffin. If you do not have LP spray, apply BP Blue Hot Wax, scrape and brush, then apply HP Blue Hot Wax, scrape and brush.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply 3-4 alternating layers of Nordic GripWax Red and GripWax Blue, corking between layers. Final layer should be Blue.

Structure: A fine structure covered by one pass with the Blue Structurite tool after scraping and brushing the final Hot Wax or before spraying HP LP will best suit these conditions.

Created by Michael Young, Toko Tech Team member since 2005.

Check the [Wax Tips](#) page at [TokoUS.com](#) before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at [TokoUS.com](#).
