

# WAX RECOMMENDATION **TOKO®**

## Twilight Classic

Bogus Basin, Boise, ID

Tuesday, February 14

5:30 P.M.

1K/5K/10K, Classic

Mass start

1-2 loops

<https://www.bbnt.ski/race>

**Forecast/Conditions:** An 80 percent chance of 2-4" of snow Monday through Tuesday. Monday night low of 14 degrees, Tuesday high of 19 and race temperature around 16. Forecast calls for clearing by race time.

**Glidewax:** Apply Base Performance Blue Hot Wax, scrape and brush. Then apply High Performance Blue Hot Wax, scrape and brush.

**Gripwax:** Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply 2 layers of Nordic GripWax Red, corking between layers. Should new snow not materialize before Tuesday night, substitute Nordic Base Klister Green for Nordic Base Wax Green, let fully harden and cover with 2 layers of Nordic GripWax Red, corking between layers.

**Structure:** A universal structure covered by one pass with the Blue Structurite tool after scraping and brushing the final Hot Wax will best suit these conditions.

Check the [Wax Tips](#) page at [TokoUS.com](http://TokoUS.com) before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at [TokoUS.com](http://TokoUS.com).
