

WAX RECOMMENDATION TOKO®

Bryce Canyon Winter Festival

Ruby's Inn, near Bryce Canyon National Park, UT

Sunday, February 19

11 A.M.

Archery biathlon ski race, Freestyle technique

<https://www.rubysin.com/bryce-canyon-winter-festival/>

Forecast/Conditions: Overnight low 10F, temperature at start in the mid-30s and sunny. Snow will be old and untransformed.

Glidewax: Apply High Performance Blue Hot Wax, scrape and brush. Spray on High Performance Red Liquid Paraffin, let stand overnight, then polish with the Polishing Brush for Liquid Paraffin. If you do not have LP spray, apply BP Blue Hot Wax, scrape and brush, then apply HP Red Hot Wax, scrape and brush.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply 1 layer of Nordic GripWax Yellow, then apply 1 layer of Nordic GripWax Red, corking between layers.

Structure: A universal structure covered by one pass with the Red Structurite tool after scraping and brushing the final Hot Wax layer or before spraying HP LP will best suit these conditions.

Created by Barry Makarewicz, Toko Tech Team member since 2000.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
