

# WAX RECOMMENDATION **TOKO**<sup>®</sup>

## **Citizen Sprints**

Little Ski Hill, McCall, ID

Sunday, February 26

6:30 P.M.

Skate

1-2 laps on 1K course (1 Heat)

<https://www.mccallnordic.com/racing/>

**Forecast/Conditions:** New snow midweek and roller coaster temperatures with Saturday high in the upper 50s. Saturday night low in the low 20s, Sunday high around 30 and race start temperature around 25. New snow of 1-3 inches likely on Sunday. Because the course is on the base of the alpine area, expect a heavily skied in track which may soften depending on the amount of new snow.

**Glidewax:** Apply Base Performance Blue Hot Wax, scrape and brush. Apply a 2:1 mix of High Performance Red Hot Wax and High Performance Yellow Hot Wax, scrape and brush.

**Structure:** A universal structure covered by one pass with the Red Structurite tool after scraping and brushing the final Hot Wax will best suit these conditions. Be sure to brush again after structuring.

Check the [Wax Tips](#) page at [TokoUS.com](http://TokoUS.com) before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at [TokoUS.com](http://TokoUS.com).
