

WAX RECOMMENDATION TOKO®

Owl Creek Chase

AVSC Clubhouse, Aspen, CO

Sunday, February 12

9 A.M.

13K, Freestyle

Mass start

Point-to-point finishing at the Aspen XC Center

<https://aspenspecialevents.com/owl-creek-chase/>

Forecast/Conditions: Overnight low 19F, with an air temp fo 25F by race start. Expect good track conditions with some dirt at the road crossing. The race is cut short due to a family of moose taking up residence on Buttermilk ski area.

Glidewax: Apply High Performance Blue/Red Hot Wax mixed 1:1, scrape and brush. Spray on High Performance Blue Liquid Paraffin, let stand overnight, then polish with the Polishing Brush Liquid Paraffin. If you do not have LP spray, apply BP Blue Hot Wax, scrape and brush, then apply HP Blue/Red Hot Wax mixed 1:1, scrape and brush.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply 3-4 layers of Nordic GripWax Red, corking between layers.

Structure: A fine structure covered by one pass with the Blue Structurite tool after scraping and brushing the final Hot Wax or before spraying HP LP will best suit these conditions.

Check the [Wax Tips](#) page at [TokoUS.com](#) before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at [TokoUS.com](#).
