

WAX RECOMMENDATION **TOKO**[®]

Mt. Ashwabay Summit Ski Race

Mt. Ashwabay, Bayfield, WI

Saturday, February 4

Start times from 9:30 A.M to 12:30 P.M.

Multiple distances, techniques and formats. See website for details. All loop courses with mass start.

<https://ashwabaysummitskirace.com/race-info/>

Forecast/Conditions: Overnight low of -2F, temperature at start will be 10F. Snow will be well packed and cold, temperature later for longer races will definitely be warming into the 20s. Expect some blown snow with wind gusting out of southwest.

Glidewax: Apply High Performance Blue Hot Wax, scrape and brush. Spray on High Performance Blue Liquid Paraffin, let stand overnight, then polish with the Polishing Brush Liquid Paraffin. If you do not have LP spray, apply BP Blue Hot Wax, scrape and brush, then apply HP Blue Hot Wax, scrape and brush.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply 3-4 layers of Nordic GripWax Blue, corking between layers. Later racers can cover with two layers of GripWax Red for added kick

Structure: A fine structure covered by one pass with the Red Structurite tool after scraping and brushing the final Hot Wax or before spraying HP LP will best suit these conditions.

Racing - Service

Check the [Wax Tips](#) page at [TokoUS.com](#) before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at [TokoUS.com](#).
