

# WAX RECOMMENDATION TOKO®

## North American VASA

Timber Ridge, Traverse City, MI

Saturday, February 11

9 A.M.

6K/12K/18K, Freestyle

Wave starts

1, 2, 3 loops on 6K course

<https://vasa.org>

**Forecast/Conditions:** Overnight low of 17, temperature at start of 22 rising to 30 for later starters. A 50 percent chance of light snow overnight. Expect rolled fresh snow over a thin transformed base, mostly sunny skies.

**Glidewax:** Apply High Performance Blue Hot Wax, scrape and brush. Spray on High Performance Red Liquid Paraffin, let stand overnight, then polish with the Polishing Brush Liquid Paraffin. If you do not have LP spray, apply BP Blue Hot Wax, scrape and brush, then apply HP Red Hot Wax, scrape and brush.

**Gripwax:** NA

**Structure:** A universal structure covered by one pass with the Red Structurite tool after scraping and brushing the final Hot Wax or before spraying HP LP will best suit these conditions.

Created by Nickola Baic, Toko Tech Team member since 2007.

Check the [Wax Tips](#) page at [TokoUS.com](http://TokoUS.com) before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at [TokoUS.com](http://TokoUS.com).
