

WAX RECOMMENDATION TOKO®

OISRAN State Championships

Mt. Bachelor, Bend, OR

Saturday, February 25

10 A.M. 4K Classic, Interval start

12:30 P.M. Mixed technique Relay

<https://oisran.org/2023-state-championships/>

Forecast/Conditions: Overnight low on Friday night of around 10F. Saturday mostly sunny with a high of 35.

Glidewax: For morning Classic race, apply Base Performance Blue Hot Wax, scrape and brush. Spray on Base Performance Blue Liquid Paraffin, let stand overnight, then polish with the Polishing Brush Liquid Paraffin. If you do not have LP spray, apply BP Blue Hot Wax, scrape and brush, then apply BP Blue Hot Wax, scrape and brush. For PM Relay, apply BP Blue Hot Wax, scrape and brush, then apply BP Blue Hot Wax/BP Red Hot Wax mixed 1:1, scrape and brush.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply multiple alternating layers of Nordic GripWax Blue and GripWax Red, corking between layers.

Structure: A universal structure covered by one pass with the Blue Structurite tool after scraping and brushing the final Hot Wax or before spraying HP LP will best suit these conditions.

Created by Colin Mahood, Toko Tech Team member since 2001.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
