

WAX RECOMMENDATION **TOKO**[®]

Minnesota State High School League Section 8

Maplelag Resort, Callaway, MN

Tuesday, February 7

1 P.M. Skate Sprint Relay Heats, 3:45 P.M. Finals

Mass starts

Forecast/Conditions: Overnight low of 18 rising into the high 20s for the races. Expect transformed natural snow, machine prepared. Mostly sunny with winds of 10 mph gusting to 20 mph from the NW. Little chance of rain/snow on race day but a 40 percent chance of snow or freezing rain Monday noon until midnight.

Glidewax: Apply High Performance Blue Hot Wax, scrape and brush. Spray on High Performance Yellow Liquid Paraffin, let stand overnight, then polish with the Liquid Paraffin Polishing Brush. If you do not have LP spray, apply BP Blue Hot Wax, scrape and brush, then apply HP Yellow Hot Wax, scrape and brush.

Structure: A fine or universal structure covered by one pass with the yellow Structurite tool after scraping and brushing the final Hot Wax or before spraying HP LP will best suit these conditions.

Created by Gerald Slater, Toko Tech Team member since 2006. grslater@comcast.net

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
