Saturday, February 11

10:30 A.M. 48K/34K, Freestyle, two laps

11:30 A.M. 15K, Freestyle, single lap

Mass starts

<https://vasaloppet.us>

Forecast/Conditions: Several days of freeze/thaw cycles will be followed by an overnight low of 14 rising to the high 20s at the start. Mostly sunny with 15 mph winds from the south. Expect this course of heavily transformed snow, which could be dirty in spots, to begin as a solid platform but soften with the rising temperature and heavy skier traffic.

Glidewax: Apply High Performance Blue Hot Wax, scrape and brush. Spray on High Performance Red Liquid Paraffin, let stand overnight, then polish with the Liquid Paraffin Polishing Brush. If you do not have LP spray, apply BP Blue Hot Wax, scrape and brush, then apply a 1:1 mix of HP Red Hot Wax and HP Blue Hot Wax, scrape and brush.

Structure: A fine or universal structure covered by one pass with the Blue Structurite tool after scraping and brushing the final Hot Wax or before spraying HP LP will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
