

WAX RECOMMENDATION TOKO®

City of Lakes Loppet Skate Races

Cedar Lake, Minneapolis, MN

Sunday, February 5

9 A.M.

20K/33K, Skate

Races are wave starts, finish at Wirth trailhead

<https://www.loppet.org/events/marathon-puoli-tour-ski/>

Forecast/Conditions: Overnight low consistent from sunset Saturday to sunrise Sunday between 25 and 27. Race time temperature in the mid- to upper 20s. Expect heavily transformed snow over the entire course, a firm track that may soften on some uphill for later skiers. Partly sunny with a 10-15 mph wind from the northwest. Little chance of snow between now and the start.

Glidewax: Apply High Performance Red Hot Wax, scrape and brush. Spray on High Performance Yellow Liquid Paraffin, let stand overnight, then polish with the Liquid Paraffin Polishing Brush. If you do not have LP spray, apply BP Red Hot Wax, scrape and brush, then apply HP Red Hot Wax, scrape and brush.

Structure: A fine or universal structure covered by one pass with the Yellow Structurite tool after scraping and brushing the final Hot Wax or before spraying HP LP will best suit these conditions.

Created by Gerald Slater, Toko Tech Team member since 2006. grslater@comcast.net

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
