

WAX RECOMMENDATION

Minnesota High School Championship

Giants Ridge, Biwabik, MN

Wednesday, February 15

10 A.M Qualifiers, 2:15 P.M. Finals

Team Skate Sprint Relays

More info [here](#)

Forecast/Conditions: 1-2 inches of snow is expected to fall during the eight hour period before the start. Winds are expected to be 10-20 mph gusting to 35 mph during this snowfall and through the races. Overnight low of 19 with the temperature continuing to drop to 13-14 for the races. A 25 percent chance of snow during the races. The course should be solid but there will be wind-blown snow.

Glidewax: Apply High Performance Blue Hot Wax, sprinkle on X-Cold powder, [iron in together](#), scrape and brush. Spray on Base Performance Blue Liquid Paraffin, let stand overnight, then polish with the Liquid Paraffin Polishing Brush. If you do not have LP spray, apply BP Blue Hot Wax, scrape and brush, then apply HP Blue Hot Wax, sprinkle on X-Cold powder, [iron in together](#), scrape and brush.

Structure: A fine or universal structure covered by one pass with the Blue Structurite tool after scraping and brushing the final Hot Wax or before spraying BP LP will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
