

# WAX RECOMMENDATION **TOKO®**

## Tour of Anchorage

Kincaid Park, Anchorage, AK

Sunday, March 5

Check event [website](#) for start times

50K and 40K start at Service HS. 25K start at APU.

50K, 40K, 25K, Freestyle and Classic

Wave start

One point-to-point event course

**Forecast/Conditions:** Saturday night lows -5F to 5F. Sunday high in the 20s. Course will be in great shape though there may well be dirt in the tunnels and at Pt Woronzof. There has been some new snow that will be mixed with transformed snow on the course.

**Glidewax:** Apply High Performance Blue Hot Wax, scrape and brush. Spray on High Performance Blue Liquid Paraffin, let stand overnight, then polish with the Polishing Brush Liquid Paraffin. If you do not have LP spray, apply BP Blue Hot Wax, scrape and brush, then apply HP Blue Hot Wax, scrape and brush.

**Gripwax:** Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply 2 layers of Nordic GripWax Red followed by two layers of GripWax Blue, corking between layers.

**Structure:** A universal structure covered by one pass with the Blue Structurite tool after scraping and brushing the final Hot Wax or before spraying HP LP will best suit these conditions.

Created by Patrick McGownd, Toko Tech Team member.

**Racing - Service**

Check the [Wax Tips](#) page at [TokoUS.com](#) before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at [TokoUS.com](#).
