

WAX RECOMMENDATION **TOKO®**

U16 Eastern Championships Mixed Relay

Fort Kent Outdoor Center, Fort Kent, ME

Sunday, March 19

9 A.M.

4 X 2.5K Mixed Relay

Mass start

<https://nensa.net/u16-championships/>

Forecast/Conditions: Overnight low 22, temperature at start 26. Possibly frozen fast snow conditions with freezing temperatures after warm afternoon Saturday. Cloudy conditions, moderate wind.

Glidewax: Apply High Performance Red Hot Wax, scrape and brush. Spray on High Performance Red Liquid Paraffin, let stand overnight, then polish with the Polishing Brush Liquid Paraffin. If you do not have LP spray, apply BP Red Hot Wax, scrape and brush, then apply HP Red Hot Wax, scrape and brush.

Gripwax: Roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply 2 thin layers of Nordic GripWax Blue, corking between layers. Then apply 1-2 thin layers of GripWax Red, corking between layers. If slipping, apply 1 thin cover layer of GripWax Yellow on top, corking smooth.

Structure: A universal structure covered by one pass with the Red Structurite tool after scraping and brushing the final Hot Wax or before spraying HP LP will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
