

WAX RECOMMENDATION **TOKO**[®]

Gitchi Gami Games CXC Cup - Freestyle

American Birkebeiner Trailhead, Cable, WI

Sunday, December 17

10K, 5K, or 2.5K Skate, Individual start

Starts beginning at 8:30 A.M. on a 2.5K lap course

<https://www.birkie.com/ski/events/gitchi-gami-games/>

Forecast/Conditions: Very warm temperatures and rain on Saturday with an overnight low of 30. Expect Sunday high near 35 with mostly cloudy skies on race day. Race course conditions are expected to be nearly 100 percent machined, wet manmade snow. Snow will be glazing as the day goes on, as this is a lap race on a 2.5K course.

Glidewax: Apply High Performance Red Hot Wax, scrape and brush. Spray on High Performance Yellow Liquid Paraffin, let stand for at least 2 hours, then polish with the Polishing Brush Liquid Paraffin. If you do not have LP spray, apply BP Red Hot Wax, scrape and brush, then apply HP Yellow Hot Wax, scrape and brush.

Gripwax: N/A

Structure: A universal structure covered by one pass with the Yellow Structurite tool after scraping and brushing the final Hot Wax or before spraying HP LP will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
