

# WAX RECOMMENDATION **TOKO**<sup>®</sup>

## Jackson Jaunt

Jackson XC, Jackson, NH

Sunday, December 31

7:30 A.M.

7K, Classic

Rolling Individual start

7 laps

<https://www.jacksonxc.org/>

**Forecast/Conditions:** Overnight low of 24, temperature at start 28. Manmade with some fresh snow tilled in, PistenBully groomed track. Mostly sunny with a daytime high of 34.

**Glidewax:** Apply High Performance Blue Hot Wax, scrape and brush. Spray on HP LP Red, let stand at least 2-4 hours, then polish with the Polishing Brush Liquid Paraffin. If you do not have LP spray, apply BP Blue Hot Wax, scrape and brush, then apply HP Red Hot Wax, scrape and brush.

**Gripwax:** Roughen base with 150 grit sandpaper, apply Nordic Base Klister Green, heat and smooth. While still warm, apply Nordic Klister Red, smooth, let cool.

**Structure:** A universal structure covered by one pass with the Red Structurite tool after scraping and brushing the final Hot Wax or before spraying HP LP will best suit these conditions.

Created by Stuart Kremzner, Toko Tech Team member since 2005

Check the [Wax Tips](#) page at [TokoUS.com](http://TokoUS.com) before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at [TokoUS.com](http://TokoUS.com).
