

WAX RECOMMENDATION TOKO®

2023 Rodrigues Sprints

Craftsbury Outdoor Center, Craftsbury, VT

Saturday, December 9

9 A.M.

1.5K, Skate

Qualifier, then Queens Court Format

<https://www.skireg.com/kendall-memorial>

Forecast/Conditions: Overnight low of 23 with temperature rising to 41 on Saturday. Cloudy conditions, no new snow. Snow will be manmade and transformed.

Glidewax: Apply High Performance Blue Hot Wax, scrape and brush. Spray on High Performance Red Liquid Paraffin, let stand 2-4 hours, then polish with the Polishing Brush Liquid Paraffin Polishing. If you do not have LP spray, apply P Blue Hot Wax, scrape and brush, then apply HP Red Hot Wax, scrape and brush. For Heats, if the temperature is rising quickly, spray on HP LP Yellow, let stand until Heats, and polish with Polishing Brush Liquid Paraffin.

Gripwax: N/A

Structure: A universal structure covered by one pass with the Red Structurite tool after scraping and brushing the final Hot Wax or before spraying HP LP will best suit these conditions.

Created by Ben Lustgarten, Toko Tech Team member since 2020.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
