

# WAX RECOMMENDATION **TOKO**<sup>®</sup>

## Skadi's Chase

Elm Creek Park Reserve, Maple Grove, MN

Saturday, December 9

8 A.M.

8K/4K, Freestyle

Mass start on this 2K lap course

[www.threeriversparks.org/page/minnesota-nordic-ski-opener](http://www.threeriversparks.org/page/minnesota-nordic-ski-opener)

**Forecast/Conditions:** Overnight low of 30 will be the first period of below-freezing temperatures since Wednesday evening. Partly sunny and breezy. Fifty percent chance of snow beginning at 6 AM and continuing throughout the races. Temperature at start forecast to be 31. Expect a moist, soft racing platform.

**Glidewax:** Apply High Performance Red Hot Wax, scrape and brush. Spray on HP LP Yellow, let stand up to 2 hours, then polish with the Liquid Paraffin Polishing Brush. If you do not have LP spray, apply Performance Red Hot Wax, scrape and brush, then apply HP Yellow Hot Wax, scrape and brush.

**Structure:** A wet or universal structure covered by one pass with the Yellow Structurite tool after scraping and brushing the final Hot Wax or before spraying HP LP will best suit these conditions.

Created by Gerald Slater, Toko Tech Team member since 2006. [grslater@comcast.net](mailto:grslater@comcast.net)

Check the [Wax Tips](#) page at [TokoUS.com](http://TokoUS.com) before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at [TokoUS.com](http://TokoUS.com).
