

WAX RECOMMENDATION **TOKO[®]**

Besh Cup #3

Lookout Mountain Cross Country Ski Trails, Homer, AK

Saturday, January 20

10A.M. Qualifiers, 12:30 P.M. Heats

1.2K, Freestyle Sprint

1 lap

[Besh Cup Website](#)

Forecast/Conditions: Overnight low 15, temperature at start 25, sunny. Well groomed, transformed clean snow with hoar frost mixed in, winds 5-10 mph and higher gusts.

Glidewax: Apply High Performance Blue Hot Wax, scrape and brush. Sprinkle on HP Powder Red, iron in, let cool, scrape and brush. If you do not have HP Powder, apply BP Blue Hot Wax, scrape and brush, then apply HP Red Hot Wax, scrape and brush.

Gripwax: Not recommended but if you classic, roughen base with 150 grit sandpaper, iron in Nordic Base Wax Green, cork smooth, let cool. Then apply 3-4 layers of Nordic GripWax Blue, corking between layers.

Structure: A Universal structure covered by one pass with the Red Structurite tool after scraping and brushing the final Hot Wax/Powder will best suit these conditions.

Check the [Wax Tips](#) page at TokoUS.com before all of your races for the latest waxing information. Toko Race Wax Tips offer racers precise waxing advice on how to make skis perform optimally for a given event. If you do not have High Performance wax, substitute Performance or Base Performance wax of the same color (Yellow, Red or Blue), as the temperature ranges are the same. All Race Wax Tips recommend ONLY fluorine-free products. Older HP or P Toko waxes (Liquid or Hot Wax) contain fluorine. New labels look very similar but all say PFC Free. To see optimal application procedures for both Glidewax and Gripwax, go to the [How To](#) link at TokoUS.com.
